

HOT SEAT

A privacy-friendly thermal monitor for shared soldering workstations.

It senses occupancy and hot-tool safety without RGB video or face recognition.

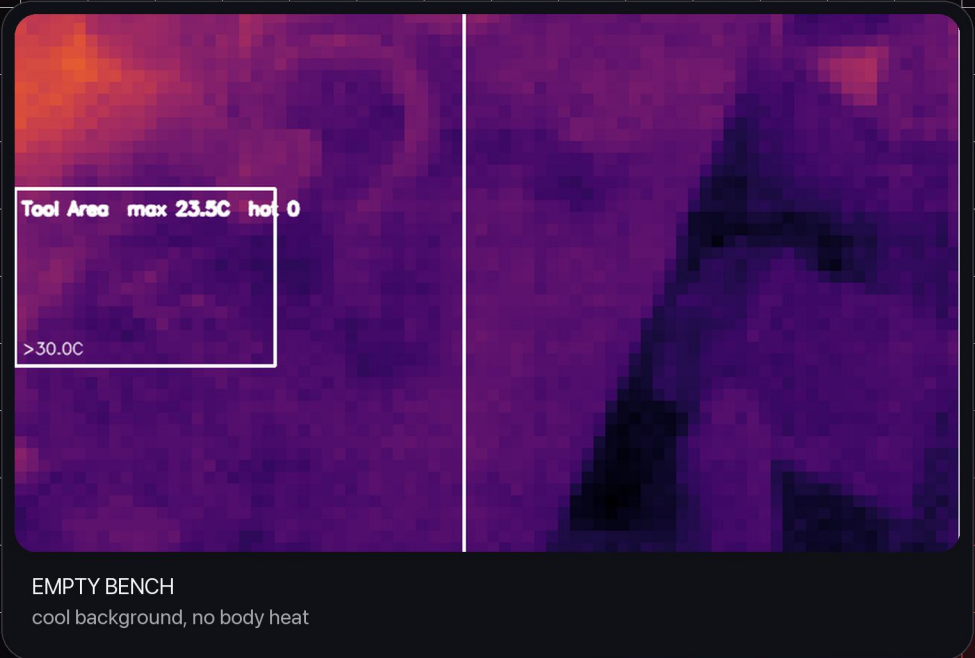

- no RGB camera
- on-device ML
- hot-tool alert

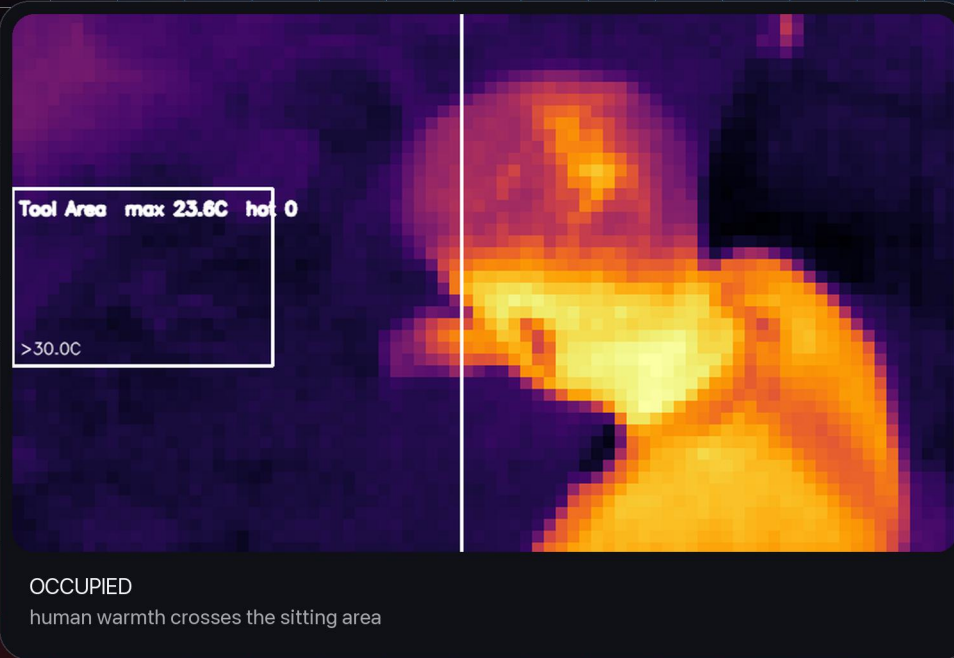

FLIR Lepton + Raspberry Pi in Lab 107

What the sensor sees

Warm bodies appear as coarse heat fields - no camera image, no face.

EMPTY BENCH
cool background, no body heat

OCCUPIED
human warmth crosses the sitting area

Deployed in Lab 107

One thermal view answers two practical questions at the real soldering bench.

Soldering workstation, Lab 107

Is someone using the bench?
